# COMMANDER EXPOSED SHOWER SYSTEMS

Inspired by industrial design – our Commander Shower Systems feature an exposed pipe, shower head and handle to create a raw, yet timeless look. Every exposed shower system features a solid brass body to deliver exceptional durability.

The Commander Shower System includes a pressure balance shower valve that protects against spontaneous spikes in water pressure – which can result in scalding hot water. Integral temperature stops allow you to easily set the maximum water temperature.

## FEATURES

- Industrial-inspired, exposed design
- Includes signature shower head of choice
- Durable, solid brass body
- Vandal-proof handles
- Features anti-scalded pressure balance valve
- Adjustable temperature limit stop
