TOOLS AND SUPPLIES

IMPORTANT

- Do not over-tighten any connections or damage may occur.
- Be sure to read instructions thoroughly before beginning installation.
- Be sure to have properly adjusted the Temperature Limiting Stop (TLS) as per the Valve Installation Instructions before installing Valve Trim.

SAFETY TIPS

Cover your drain to prevent loss of parts.

MAINTENANCE

Your new Speakman Product is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. The use of harsh chemicals and abrasives on any of the Speakman custom finish products may damage the finish and void the product warranty. Please be sure to only use approved cleaners. Please contact Speakman for any clarification of acceptable cleaners.

WARRANTY

Warranty information can be found at:  
www.speakman.com

1

Clean wall surface. Place Mounting Base (1) onto the valve, align mounting holes, and secure with supplied screws (2).

2

Verify the position of the Spindle within the Mounting Plate, as shown below. If the end of the Spindle extends beyond the Mounting Plate, then use the Shallow Mount Adapter. If the end of the Spindle is flush to, or is within the Mounting Plate, then use the Deep Mount Adapter.

FOR SHALLOW MOUNT APPLICATION

FOR DEEP MOUNT APPLICATION

3

Confirm that Valve is in the "Off" position. Place appropriate Connector (1) on to the Spindle of the Valve, making sure to orient the Connector so that one set of Splines are in a perfectly vertical position. Secure Connector with 8-32 screw provided (2).

Splines in Vertical Position

4

Place Escutcheon (1) on Mounting Base. Take care to orient the Escutcheon as shown below.

5

Align Handle Assembly with Connector (1) and Escutcheon as shown below. Keep Handle (2A) in a stationary vertical position and place over Connector (1) and engage the Splines of the Connector with the Handle Assembly. Keep Handle in the vertical position as you thread Handle Hub (2B) on to Mounting Base. Tighten until snug.

### IMPORTANT

Be sure to read instructions thoroughly before beginning installation. Do not overtighten any connections or damage may occur. This hand shower has an optimal operating range of 20-80 psi.

### SAFETY TIPS

Cover your drain to prevent loss of parts.

### MAINTENANCE

Periodic cleaning using a mild soap and warm water will help keep your Hand Shower's appearance in its original condition.

For best results, dry immediately with a soft, clean cloth. **DO NOT USE** harsh and/or abrasive cleaners.

On CHROME PLATED HAND SHOWERS, a two (2) part white vinegar, one (1) part water solution can be used to break down excessive mineral deposits on the sprays. Let the hand shower soak in the solution for about ½ hour then rinse thoroughly. Brush off any remaining mineral deposits if necessary.

**DO NOT USE** the vinegar/water treatment on any finish other than Chrome.

To reduce mineral build-up, turn the handle to FLOOD position to let the water drain out after every use.

### WARRANTY

1

Loosen Set Screws with supplied Allen Wrench, and remove Mounting Brackets from both ends of Slide Bar assembly.

2

Place Slide Bar Assembly on to wall in the desired mounting position. Take care that the Slide Bar is oriented in a vertical position. Using a pencil, lightly trace outline of end brackets on to wall.

3

Center Mounting Bracket within traced outline. Mark the 2 locations with a pencil.

4

Drill 1/4" hole in marked locations. If drilling into tile, be sure to use a drill bit designated for tile. If mounting directly into stud or wood wall, secure lower end bracket to wall with mounting screws without drilling holes.

5

Push the Plastic Anchors (x4) into the drilled holes. Ensure the plastic anchors are flush with the wall. (Note: Plastic Anchors provided may not be suitable for all types of wall construction, seek professional help if in doubt).

6

Secure Mounting Plate with the Mounting Screws provided. Ensure Recess Area of Mounting Plate is aligned vertically as shown below.

7

Install Slide Bar assembly over Mounting Brackets, and secure with Set Screws using supplied Allen Wrench.

8

Orient the Hand Held Shower Bracket to your desired position. Adjustments are made by rotating the Cross Handle counter-clockwise to release the position, and clockwise to lock into the desired position.

9

Note: If the Hand Shower Holder no longer holds position, Loosen the Set Screw (1) from underneath the Bracket using the supplied Allen Key. Tighten the Screw (2) in the Shower Holder using a Phillips Head Screwdriver. Then, re-tighten the Set Screw (1) from below.
