TOOLS AND SUPPLIES

IMPORTANT

- Be sure to read instructions thoroughly before beginning installation.
- Be sure to have properly adjusted the Temperature Limiting Stop (TLS) as outlined in the Valve Installation Manual.
- Cover your drain to prevent loss of parts. Be sure to wear eye protection while cutting pipe.

MAINTENANCE

Your new Valve Trim is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. The use of harsh chemicals and abrasives on any of the Speakman custom finish products may damage the finish and void the product warranty. Please be sure to only use approved cleaners. Please contact Speakman for any clarification of acceptable cleaners.

SPECIFICATIONS

SUPPLY INLET: 1/2" NPTF

FLOW RATE: 2.5 GPM/9.46LPM MAXIMUM

FLOW CONTROL: VARIABLE

SHIPPING WEIGHT: 2.1 LBS

OPTIONS:

AP	Anchor Plate Assembly with Mounting Screws

E20	Low Flow Head (2.0 GPM/ 7.6 LPM) (Ball Joint Only)

INSTALLATION

Apply pipe thread tape in a clockwise direction to threads of supply nipple. Pipe joint compound may be used instead of tape. Turning in a clockwise direction, thread the showerhead on to the supply nipple. Tighten & position with a strap wrench or a pair of soft jaw pliers. Mark and drill holes for mounting screws (not provided). Note: If necessary, remove shower head and use proper screw anchors (4) (not provided). Turn the water supply on and check for leaks. Tighten mounting screws (4).

OPERATION

To adjust the spray pattern of the shower head, simply rotate the handle to the desired spray (needle spray, gentle rain or full flood).

MAINTENANCE

The gleaming finish of your SPEAKMAN WATERSAVER® shower head can be cleaned by using mild soap and warm water. Dry immediately with a soft, clean cloth for best results. The flow control device limits water flow to 2.5 gallons per minute. The small orifice may become clogged with scale and other minerals found in potable water. To clean the flow regulator, simply loosen the side set screw and remove the shower head from the flanged elbow, remove the flow control from the brass retainer and clean as necessary.
